

Helping You Make Your Own Luck This March

It takes more than pure luck to best care for your property. If you're not actively maintaining your home, all the four-leaf clovers you can find can't help you.

There's no need to worry when we are here!

Our electricians know that it takes care and respect for your electrical systems to best maintain your home's safety and smooth electrical operation - and we're ready to ensure your property is well looked after.

Get To Know Our Technicians: Introducing Dylan

"My passion for outdoor activities such as riding four wheelers, fishing, and spending quality time with my kids brings joy to my life."

"Since I graduated high school, I have been committed to electrical work, gaining experience in different areas of expertise."

"Being part of SSE, a small family-owned business, provides me the opportunity to offer quality customer service, which satisfies my personal interests in providing the best experience to our customers."

- Dylan Swam, Electrician at Superior Service Electric

Spring Cleaning And Simplifying Your Home Maintenance

You don't have to dread spring cleaning anymore. With the official first day of spring rapidly approaching, we have some helpful tips to keep your home tidy and well-maintained without you needing to break out the mop and bucket just yet.

- **Delegating Simple Care To Your Youngest Cleaning Staff** - If you have little ones at home contributing to the mess, they can certainly contribute to the cleaning, too! You know your kids best, so identify simple cleaning chores that they can take charge of on a weekday evening or weekend. Celebrating their victories when they get the job done can make them feel excited about helping out.
- **Creating A Cleaning Schedule & Planning Your Home Maintenance** - When you look at your whole house and your cleaning or maintenance to-do list all at once, it can be daunting. Break up those cleaning chores over the full course of the week to make your home care more approachable.
- **Testing GFCI Outlets As You Clean Your Kitchen And Bathrooms** - When outlets are installed near water fixtures, it is best to use GFCI outlets for extra safety. With dry hands, try your outlet's "Test" and "Reset" buttons to verify they are operating properly. If you don't see changes in the warning LED in your outlet or see and feel the "click" when it trips, call us out for an electrical safety inspection and possible outlet replacement.

Superior Service Electric is here for all of your electrical system needs. Contact us [online](#) or call us at (205) 433-4022.
