

## Tips For Beating The Heat This Summer

The summer solstice officially marked the start of summer on June 20 this year - but we know that it has felt like summer for quite a while now.

With the increasing temperatures, it's important to ensure your electrical system is up to the task of keeping your home cool. Upgrading your electrical panel or installing energy-efficient lighting and ceiling fans can help reduce your energy consumption and keep your home comfortable.

So you can cool off with an ice-cold beverage or frozen treat and relax while our team takes care of your property this summer!

## Get To Know Our Technicians: Introducing Colby

*"Since joining Superior Service Electric in 2023, I've learned a fresh perspective and unwavering commitment to excellence. Outside of work, I am an avid snowboarder and passionate traveler, always seeking new adventures."*

- Colby Monroe, Electrician at Superior Service Electric

## A Guide To Keeping Your Cool & Staying Comfortable

Keeping your cool can be difficult. Luckily, we've got some easy-to-implement tips for staying cool and comfortable all summer long.

- **Creating A Chill Sleeping Environment** - Generally speaking, it's easier for most people to fall asleep when things are a little cooler than usual. That doesn't necessarily mean you have to crank down your AC and cool your whole household down. Consider using fans or cooling mattress pads to keep yourself cool without running your AC all night.
- **Closing Curtains And Blinds To Block Out Sun & Heat** - While you may temporarily miss the view, closing your window treatments can help to keep your individual rooms more comfortable by blocking out the sun.
- **Ensuring Your Electrical System is Efficient** - Have a professional electrician inspect your home's wiring and electrical panel to ensure they can handle the increased load from cooling devices. Proper maintenance can prevent electrical issues and help your cooling systems run more efficiently.

**Superior Service Electric is here for all of your electrical system needs. Contact us [online](#) or call us at (205) 433-4022.**
